Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I (claims 1-4) in the reply filed on October 21, 2005 is acknowledged. In the absence of any ground(s) of traversal, the requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Torrey (3741786).

Torrey relates to a device comprising a sheet of release paper having a first side coated with first silicone and coated intermittently with pressure sensitive adhesive (PSA). The sheet also has a second side which is coated with silicone and the sheet is provided in a roll form. See col. 1, lines 10-14; col. 1, line 69 to col. 2, line 10; col. 3, lines 20-25; col. 4, lines 24-26 and 37-39.

The PSA is in a dotted pattern (figure-1 and col. 3, lines 62-68). The precise configuration of the PSA pattern is not critical as mentioned in col. 3, lines 57-60.

The preamble phrase "A repair device" has not been given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self

contained description of the structure not depending for completeness upon the introductory clause. *Kropa v. Robie*, 88 USPQ 478 (CCPA 1951).

Further, the process conditions such as "subsequently coated", etc. and the intended use phrases such as "wherein the engagement of the first side...PSA to said surface", etc. have not been given any patentable weight because said phrases are not found to be of positive limitations.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Torrey.

Torrey, as discussed above, fails to teach that the PSA is in a swirl pattern. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Torrey by providing swirl pattern of PSA to form a change in the aesthetic design, because such a change would have involved a mere change in the design of the adhesive pattern. A change in design is generally recognized to be within the level of ordinary skill in the art. *In re Seid*, 73 USPQ 431.
